Agenda Item #19

The Single DOIM Concept as Related to Non-Army Tenants on Army Installations - Update

Jeremy Hiers
HQDA, CIO/G-6
Architecture, Operations, Networks, and Space (AONS) Directorate
Information Infrastructure Integration Division (I3D)

Single DOIM (U)

- **(U) Single DOIM Guidance: Each Army Installation will have only one provider of Army C4IM Services.**
  - Army Tenants: does NOT apply to mission specific applications/tools that exceed the C4IM Services List. Tenants are encouraged to reimburse the DOIM to provide mission specific IT services.
  - Non-Army Tenants: the same mandate does NOT apply.
    - Ideally, the Single DOIM should service the Outside Cable Plant (OSP) connectivity between the building demarcation point and the Installation Point of Presence (PoP) for ALL tenants (Army and non-Army).
    - Non-Army tenants could reimburse DOIM to provide services where operationally and technically feasible in accordance with policies.
